

Customized Plan Review

Customized Plan Review (CPR) is now being offered by Building Permits & Inspections. The **CPR** process is a Project Management Tool that will result in time and financial **SAVINGS** for your client.

PERSONALIZED CUSTOMER SERVICE

Your plans are assigned to a **CPR** Representative whose main priority will be your plans. The **CPR** Representative:

- Will be **your** On-Site Representative
- Will Guide **your** project in obtaining code compliance
- Will Discuss possible plan revisions, alternate building materials or processes
- Will Clarify comments or required corrections

COMBINE our **CPR** Representative with our Internet Permitting Information Service and you will experience a Permitting Process that keeps you informed throughout the process and results in a satisfied client.

REDUCED PLAN REVIEW

GO to the head of the line. Your plans do not follow standard routing process, slowed often by needed corrections and re-reviews. Instead your plans are ushered **immediately** in the most efficient manner through the various Departments within the City by your **CPR** Representative. This will streamline the review process between Building Permits & Inspections, Planning Department and Land Development, three Departments with different procedures and unique requirements.

In addition, your **CPR** Representative becomes your personal assistant, checking on the status of your plans, consulting with the different disciplines to clarify plan comments and any other situation, which would require a **"personal touch"**.

CPR CONFERENCE

WHEN your plans have completed their first review cycle, your CPR Representative will notify you personally. A **CPR CONFERENCE** at the offices of Building Permits & Inspections will be scheduled for a time **convenient** to you. You and your designers, engineers, architects or other responsible persons will meet with your **CPR** Representative and our plan review staff. During this conference, corrections, clarifications and additional documentation may be brought forth to answer any questions needed to allow approval of your plans. With our new wide format scanner soon to arrive, BP&I will be able to reproduce any plans necessary during the Conference, if needed for a minimal printing fee.

CONFERENCE DAY

PERMIT ISSUANCE

At the end of your personalized **CPR** meeting, if all necessary corrections have been made, your plans will be ready for building permit issuance. This means that after paying the required permit fees you will **leave** the meeting with your **permit in hand**, ready to begin your project!

TIME MANAGEMENT

Now you can know when you'll be issued a building permit! No more wasted time spent waiting. You can now accurately determine when you can start work on a project. This allows you to schedule your financing, determine when workers & equipment will be required at the site, secure and schedule delivery of materials and more!

COST EFFICIENCY

All of these benefits are yours at a nominal cost over the standard permit price. The fees are \$750.00* basic **CPR** fee and \$125.00 per hour for the expedited plan review. **You Save** the one thing you can never recover. **Your Time!** Plan review now takes just hours instead of weeks or even months!

*Includes \$250.00 City-County Health Plan Review Fee

THE BEST DEAL IN TOWN

Listen to Our Satisfied Customers!

"We wanted to commend you and your staff on the CPR Plan Review process...Your special attention concerning the initial code issues on this project were vital in a timely construction start for the project."
U-Storage of El Paso, 2005

"We appreciate and enjoy the ability to have one day plan reviews with staff. We will recommend this process to any consultant."
Andy Cook, EMC Engineers, L.L.C.

"I would like to take this opportunity to thank Building Permits & Inspections for working with C.F. Jordan and EPISD in securing permits for the EPISD 2003 Bond Program. To date we have secured 21 Building permits and 45 million dollars of projects in construction."
Raymond Smith, C.F. Jordan
